RE: Evergreen Shipping Agency (America) Corp. to Pilot IANA's New Street Interchange Application

Evergreen Shipping Agency (America) Corp. has expressed an interest in IANA's Street Interchange Application and wishes to conduct a pilot of the service to facilitate street interchange and street turn transactions that arise in the Long Beach/Los Angeles California region. **Effective April 23, 2018, Evergreen will require that all Motor Carriers wishing to perform a street interchange or street turn request, by using POP or trucker's own chassis only, at specific Los Angeles/Long Beach locations to please do so using IANA's Street Interchange Application. For your reference, an initial list of the pilot original interchange locations is shown on the following page.** Motor Carriers should continue to use the current method for requesting street interchange or street turn requests for locations other than those specific Long Beach and Los Angeles locations shown on the following page.

Motor Carriers may access IANA's Street Interchange Application via link on navigation bar once logged into their UIIA account or by going directly to www.streetinterchange.com and using their UIIA credentials to log into the system. The application provides an efficient method for UIIA participants to facilitate the street interchange and street turn process. Features of the system include:

- Captures electronically the transfer of liability, damage and indemnification set forth under the UIIA from the originating Motor Carrier to the receiving Motor Carrier when a street interchange is performed or when move transfers from import to export for street turn transactions.
- Provides automatic validation to confirm that the receiving Motor Carrier has a valid UIIA interchange with the UIIA Equipment Provider(s) involved in the street interchange transaction.
- Provides access to supporting documentation related to the street interchange transaction to all involved parties, which can be of assistance in cases of disputes. In addition, this documentation will enable EPs to properly allocate free time and per diem based on terms contained in their individual UIIA addendum as well as maintenance and repair charges.

In addition to the administrative benefits above, Evergreen also wants to make Motor Carriers aware of the following operational benefits they will see with better utilization of Evergreen equipment in their possession by performing street turns/street interchanges of this equipment via IANA's Street Interchange Application:

- Reduce driver hours by street turning
- Saving miles, fuel, environmentally friendly
- Avoid long lines and terminal congestion by street turning containers

Instructions for utilizing the street interchange application may be found on the UIIA website at www.uiia.org or by the following link: [Motor Carrier Street Interchange Instructional Guide](#) . Specific instructions on how to initiate a street interchange request through the application may be found on page 15 and on how to initiate a street turn on page 20 of the instructions.

Should you have any questions regarding the street interchange application, please feel free to contact our office at 877-438-8442. Thank you.
