

Revised 6/20/07

Requirements for UIIA Equipment Providers for Workers Compensation & Employer's Liability:

- Some UIIA Equipment Providers may require that Motor Carriers maintain a workers compensation insurance policy that may also need to include Employers Liability coverage. The limits require for this policy vary according to the individual Equipment Provider (EP Limits document). Please note that the limits required for workers compensation are shown in US Funds so if the policy being provided is in Canadian Funds the limits must meet the equivalent of the US Funds limit shown.
- Most workers compensation policies are provided with statutory limits. This will need to be noted on the certificate of insurance. If the workers compensation policy includes Employer's Liability coverage, the limits for this portion of the policy must be included on the certificate as well.
- Motor Carriers that are self-insured or do not carry workers compensation and/or employer's liability will need to contact the individual Equipment Providers that require this coverage to request a waiver or approval for self-insurance. The UIIA office cannot waive this coverage or approve self-insurance, only the Equipment Provider requiring the coverage can do so. **Please note that self-insurance cannot be provided on the certificate of insurance.**
- Motor Carriers that are exempt for workers compensation will need to provide a letter on their company letterhead stating that their company is exempt and the reason for the exemption (ie. use only owner operators, not required by state domiciled in). The letter will need to be signed by an officer of the company and faxed to the UIIA office at 301-982-3414. Upon receipt of the letter an exemption for this coverage will be entered in the database. Please note the letter provided is valid for one year from the date of the letter. Each year the motor carrier will be required to provide a new letter to maintain the exempt status for workers compensation.
